Listen for the sounds of the bush – bright coloured honeyeaters, brilliant parrots, cicadas or perhaps just the sound of silence.

Travel through the Island's most productive country to the north coast. Walk through the bush with your guide – through strangely shaped trees learning what makes that noise, whose tracks are those, and who left THAT little pile there? Look for small wallabies almost extinct on the mainland, a kangaroo found only on Kangaroo Island and a variety of other birds, plants and animals.

Break for lunch at a private bush camp and enjoy a delicious meal featuring King George whiting (local sea fish), fresh salads and fine South Australian wines. At Seal Bay Conservation Park take a private tour with your guide among Australian sea-lions on a

beautiful sandy beach – an experience similar to that of the Galapagos. Watch pups nursing or playing in the surf, see old bulls bearing the scars of territorial disputes and learn about their unique breeding biology. Return to the hotel for dinner. *Kangaroo Island Lodge*

#### Day 3: Flinders Chase Focus (BLD)

Begin the day in the island's north-west in an important private wildlife refuge with Kangaroo Island Land for Wildlife. Check out wildlife surveys targeting tiny endangered mammals and get an introduction to the bush, so the fire ecology experienced later in the day has context.

Break for an elegant picnic lunch in the bush, featuring marinated poached chicken, fresh salads, cheeses and fantastic South Australian wine, beer, soft drinks and spring water. After lunch, travel into Flinders Chase National Park and explore the massive shapes of Remarkable Rocks, a natural sculpture perched on top of a dome of granite emerging from the ocean. See the power of the Ocean swell continues at Admirals Arch, a coastal grotto home for a large colony of Long-nosed fur seals. *Kangaroo Island Lodge*

This 5 day tour to Kakadu, Katherine and Litchfield starts and finishes in Darwin. See the wetlands, rock art and waterfalls of Kakadu, take part in a hands-on Aboriginal cultural experience, spend a full day in Litchfield and take a cruise through Nitmiluk Gorge (Katherine Gorge). This tour is accommodated in motel rooms, bush bungalows and station rooms. Tour operates during the dry season only (May-Sep)

#### Day 1: Darwin - Kakadu National Park (L)

Depart early from your Darwin hotel on your 4WD Safari to Kakadu, Katherine & Litchfield. Head along the Stuart highway & the Arnhem highway into the wetlands region arriving at Fogg Dam Conservation Reserve. These wetlands are significant due to their natural eco-systems, great variety of fauna & birdlife.

Take a cultural tour at Pudukul, an Aboriginal owned family business giving you a chance to engage with local Aboriginal people, the environment and wildlife. Learn about basket weaving, dilly bag making, try spear throwing, blowing a didgeridoo, play the clapsticks and learn about local bush food and medicine.

After lunch, we make our way into World Heritage listed Kakadu National Park, the largest national park in Australia. It is home to some of the world's finest rock art and a variety of habitats, including floodplains and savannah woodlands. Travel to Ubirr, where we walk through galleries of ancient aboriginal rock art, learn about bushtuckers and bush medicines. Arrive at the plateau where you can relax and enjoy the view over the floodplains and the Arnhemland escarpment.

#### Day 2: Kakadu National Park (BL)

Make our way to Nourlangie Rock, an ancient Aboriginal shelter, where we will explore the area and the rock art. Your guide will lead you on an interpretive walk around the site, followed by Nawalandja lookout. The hike to the lookout is rewarded by a magnificent view over the Arnhemland escarpment.

Next stop is Maguk (Barramundi Gorge and falls). Termite mounds are abundant along the dirt road that takes us to the Maguk car park where we start our walk through a paperbark forest to reach the gorge.

In the afternoon, board the sunset Yellow Waters wetlands cruise. Yellow Waters billabong is located at the end of Jim Jim Creek, a tributary of the South Alligator River. This is the largest river system in Kakadu and contains extensive wetlands, including river channels, floodplains and backwater swamps. # ULTIMATE KAKADU AT BAMURRU PLAINS

## 4 day Ultimate Kakadu Experience

We invite you to immerse yourself in an extraordinary bush experience on the coastal floodplains of Australia's Top End. Bamurru Plains is a safari lodge with exclusive access to 300 km<sup>2</sup> of floodplains and savanna woodland on the Mary River, on the edge of Kakadu National Park. A profusion of bird and wildlife are at the doorstep of this unique bush experience that exudes 'Wild Bush Luxury' and brings a touch of style to the discovery of a remote and beautiful wilderness.

The true luxury of Bamurru Plains is its location. This beautiful wilderness region of over 300 square kilometres is shared by about 20 guests. The area is home to one of the largest crocodile populations in the world, and the annual migration of over one hundred thousand magpie geese is a sight to be seen. A stay at Bamurru is bound to inspire a greater awareness of Australia's unique and specialised environment. Watch as hundreds of birds take flight from around the infinity-edge pool, scan the shallows for big saltwater crocodiles as you skim across floodplains by airboat or slowly cruise the Sampan River watching for silver flashes of fish breaking the surface. On guided walks and game drives search for brumbies, buffalo, dingos and wallabies or pause to consider an intriguing reptile or the adaptations of a particular insect.

### Safari Bungalow

Spacious and cool, each of the nine safari bungalows are built on stilts overlooking the floodplains frequented by a myriad of bird and animal life. Mesh screens serve as your walls on three sides of your Safari Bungalow. Being surrounded by semi-transparent screens provides an experience in which you can hear, see and almost touch the wildlife and wilderness around you. The alarm clock in the morning is the call of magpie geese, after whom the camp is named, as the orange light of dawn spreads across the floodplain, all is audible and visible without having to leave your bed!

The focus is on a supremely comfortable bed (organic cotton linen, pillow menu) and a spacious ensuite bathroom with high pressure showers. In addition to corrugated iron and lantern lighting, the bungalow décor reflects the region's earlier indigenous, hunting and pastoral history with buffalo horns, explorer's maps, Aboriginal art work and fish traps as well as old photos providing a sense of the human heritage of the area. Each room has a cold water thermos, local flora and fauna reading materials and species list. You won't find a TV, CD player, mini bar or even mobile phone reception here – a true escape from the hustle and bustle of city life.

### Kingfisher Suite:

Our largest safari bungalow is the Kingfisher Suite with expansive floodplain views through Bamurru's trademark ceiling to floor mesh walls. With 81m<sup>2</sup> space in the bedroom alone, the suite features a king size bed, generous lounge area and a bathroom with twin basins and showers. The décor of rustic chic timber and recycled corrugated walls is utterly in tune with the environment and pastoral heritage of the area. For maximum exposure (and only the local Agile Wallabies as company) the suite also offers a shower with full ceiling to floor views across the floodplain and surrounding paperbark forests.

## SAL SALIS NINGALOO REEF

4 day Beach Retreat from \$2,245^A

On a remote stretch of WA's Ningaloo coast, lies our exclusive eco-friendly luxury camp. Sal Salis Ningaloo Reef is an exclusive beach safari camp nestled in the dunes of the Cape Range National Park near Exmouth in Western Australia.

Each of the 15 eco-luxe wilderness tents offers views of the surrounding bush and over the Indian Ocean and the fringing Ningaloo Reef. Your safari style tent is the ultimate in bush luxury. Wake to the song of a butcher bird, the raucous squawks of a galah or the thump of a wallaroo passing by. Fill your days however you choose, relax in your tent's hammock and watch the world go by, or laze on the beach and paddle in the warm Indian Ocean waters. Our most popular experiences are in the water, as Ningaloo Reef is where you can swim alongside majestic whale sharks and humpback whales.

Right off the shores of our camp, you will have access to the UNESCO World Heritage listed Ningaloo Reef where you will find more than 500 species of colourful fish, 250 coral species, rays and turtles. Explore the rugged landscapes of the Cape Range National Park and view unique flora and fauna. You'll spot red kangaroos, wallaroos, rock wallabies, goannas, echidnas and more than 100 bird species.

**Wilderness Tent:** Hidden in the dunes overlooking the pristine beach, Sal Salis brings a touch of eco-luxe style to this remote and beautiful wilderness. Sal Salis' spacious wilderness tents sit on raised platforms with views of the natural surrounds and ocean. Sal Salis provides a unique place to explore and take in the extraordinary environment and wildlife that surrounds it. Imagine waking to the song of birds as you catch a glimpse of kangaroos grazing among the dunes, or the spectacle of breaching whales as you tuck into breakfast or enjoy a morning swim in Ningaloo's crystal-clear waters.

**Whale Sharks - Swim with the World's Largest Fish:** Each year between March and July these slow-moving, gentle giants migrate past Ningaloo Reef. The world's biggest fish can grow to lengths of 12 metres or more. Fortunately for most sea-dwellers (and for us) they feed primarily on plankton and krill, taking in huge gulps of water and filtering out their microscopic meal

### Humpback Whales: Swim Humpback Whales

Every year between August and October, the magnificent humpback whales swim through the waters of the Ningaloo Marine Park. We used to revel in seeing these creatures in the ocean from our camp, but since 2016 you can now experience a swim right alongside them. We can report it as being a truly 'transformative' experience ... for all nature lovers, this is 'bucket-list-stuff' at its very best!

# PHOTOGRAPHY WORKSHOP

## 3 day Guided Journey

The Wet Tropics World Heritage area offers a sublime mixture of landscapes, including waterfalls, mountain ranges, idyllic streams, deep gorges and dense rainforest. These diverse habitats provide photographers with abundant chances to photograph flowering plants, butterflies, insects, frogs, reptiles, marsupials and a significant proportion of Australia's glorious songbirds. Join Expert Nature Photography Guide, Kelvin Marshall in showcasing this region's extraordinary biodiversity.

### Day 1: Daintree Village

You will be collected from Cairns Airport to begin your travels to the Daintree Village for your first night. [Red Mill House](#).

### Day 2: The Daintree Rainforest & Mossman Gorge

This is one of the best examples of a tropical river with rainforest growing right to the water's edge, which provides for some great birding. The river is most famous for the great-billed heron and little kingfisher. The heron, one of the world's largest, was always a 'phantom' bird for birdwatchers. Once birding tours commenced on the river, exploring the small rainforest and mangrove creeks that ran from it, the bird was seen more regularly. Even now, however, it remains elusive and can melt into the shadows of the rainforest or mangroves right before your eyes.

River cruise with local birding expert and river guide, Murray Hunt. Dawn cruises provide the best conditions for those wishing to see the river at its most stunning, as well as the greatest chance to see some of the most sought-after birds of the river.

Referred to in many 'birding' reference books, this famous cruise has been in operation for more than 20 years. Key target species include Great-billed Heron, Papuan Frogmouth, Little Kingfisher, Azure Kingfisher, Black Bittern, Saltwater Crocodile, Green Tree Snake, Water Dragon and butterflies. Breakfast is at Crocpress Café. Continue to Mossman Gorge which forms the southern sector of the

renowned Daintree Rainforest. The Daintree Rainforest was World Heritage listed in 1988 and is the last remnant of the oldest surviving rainforest in the world. Here visitors are afforded a rare chance to revel in its beauty and take in every aspect of the Daintree region.

For photography enthusiasts, the Gorge offers unrivalled postcard scenery. The main Gorge area is composed of large granite boulders peering from the lush freshwater river, with endless reflections of Tropical Rainforest. Further exploration can reveal hidden streams with overhanging trees, moss vines and creepers. Decaying wood reveals life in the undergrowth whereby incredible fungi and mushroom act as great focal points.

These spectacular landscapes are prime spots to observe reptiles, amphibians, & butterflies, including the boyd's forest dragon, white-lipped tree frog, green-eyed tree frog, snapping turtle, leaf-tailed gecko & electric blue ulyssees butterfly. Lunch is at Driftwood cafe.

Observing the changes in landform and vegetation provides an extra dimension to your photography journey along The Savannah Way. This is an ancient yet dynamic landscape, washed by monsoonal rains each wet season. The contrast from Rainforest to Savannah is dramatic and exciting.

We'll pass through many bioregions comprising Australia's Tropical Savannahs. Altogether the area is 1.9 million square kilometres, about a quarter of the continent. The Savannah Way is your access to the

incredible limestone country to the West.

### Chillagoe Tourist Village

### Day 3: Chillagoe & Granite Gorge

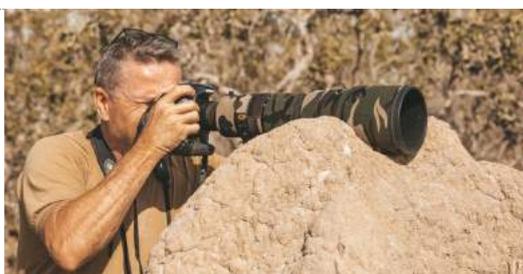

Just out of town is the Chillagoe-Mungana Caves National Park containing limestone caves. There are between 600 and 1,000 caves in the Chillagoe-Mungana area. The caves, the spectacular karst landscape & the mining and smelting history provide brilliant opportunities for landscape photography.

Visit locations such as Balancing Rock, The Smelters and the Walsh River. Plenty of time for a swim here, keep your eyes peeled for Freshwater Crocodiles. Wildlife opportunities of the region include kangaroos, wallabies, blue-faced honeyeaters, bluewinged kookaburras and dingoes. Catch a lucky glimpse of the bright green and scarlet feathers of red-winged parrots as they fly noisily to distant trees.

Our final photography destination for the tour is a wonderful highlight. The landscape at Granite Gorge is a natural adventure playground with gigantic boulders, caves, swim holes, creeks, bridges and waterfalls. Spend an afternoon with the beautiful Mareeba Rock-wallabies that have become quite accustomed to visitors over the years. The striking landscape is full of opportunity to get that Wallaby in the perfect spot for an incredible nature portrait

The nearby river system is again another wonderful chance to cool off during the heat of the day. Return to Cairns late afternoon.

After dinner, Reefsuite guests can retreat to the privacy of their undersea accommodation. Sit back, relax & watch as the reef comes to life through the floor to ceiling windows.

Reefsuites give a whole new meaning to 'a room with a view' and you'll awake to see the marine life going about another day on the world-heritage listed reef they call home.

Enjoy a leisurely breakfast and an exclusive morning on the reef before heading home in the afternoon with memories that will stay with you forever.

**About The Reefworld Project:** The refurbishment of the Reefworld pontoon is proudly supported by the Queensland Government's Growing Tourism Infrastructure Fund. Cruise Whitsundays is proud to support the region's unique natural environment in delivering this Australian-first tourism experience. The team works hand-in-hand with the Great Barrier Reef Marine Park Authority to ensure all elements of this project are approached in a sustainable and environmentally conscious manner.

The refurbished Reefworld pontoon features two Reefsuites and has been returned to its former location on Hardy Reef, thus minimising impact on the surrounding marine environment. In working with the relevant environmental agencies during this project, we are proud to have achieved the largest natural coral transplant ever to be undertaken on the Great Barrier Reef.

More than 4000 pieces of coral have been sustainably removed from old moorings and successfully replanted onto the existing reef wall to rejuvenate the local environment. As part of this, a coral farm was established to encourage further growth in the area. Commitment to the marine environment continues well into the future with the new pontoon providing accurate reef knowledge, conservation guidance and general reef education to all guests.
